Agenda

1. Universal numbering and identity in real life
2. Applying the principles to documents and contracts
3. The technology in action
4. Transformative potential
5. Deploying the technology
6. Overview of Integra technology stack
SIM Card
7.2 billion mobile phones in use
8 trillion text messages/yr.
$1.4 trillion revenue/yr.
Bank Card
1.2 billion cards in use
350+ billion transactions/yr.
$46 trillion annual volume
IP Address
1.7 billion websites
Over 100 trillion emails/yr.
4.1 billion email users
What do they have in common?

• Globally unique identifiers
• Systems of identity, ownership, and authentication
• Distributed databases, synchronized between many unrelated parties

The result!

• Global interoperability
• Instant, universal access
• Near-perfect data reconciliation: funds, calls/texts, and emails move from sender to receiver with near-100% high success
- Hundreds of trillions of dollars of annual value
- No universal numbering, proof of existence, or authentication
Integra is following the **pattern**

What cellular technology did to personal communication

What credit cards did to global payments

What IP addresses and DNS did to universal information access.
NOTE

Date

1. BORROWER'S PROMISE TO PAY
   In return for a loan to the amount of $10,000 (the "Principal"), I promise to pay the Principal plus interest, in the order of the Loan. I will make all payments under this Note in U.S. currency in the form of cash, check, money order, or other payment method accepted by Lender. Interest will be calculated on the outstanding balance of the Loan. The Lender is entitled to receive payments under this Note in the form of cash or check.

2. INTEREST
   Interest will be charged on unpaid Principal as of the due date of each payment. I will pay interest on the outstanding balance of the Loan as of each payment due date. The interest rate for the Loan is 5% per annum. The Lender is entitled to receive payments under this Note in the form of cash or check.

3. PAYMENTS
   (A) Time and Place of Payment
      I will make the first payment on this Note on or before the due date of the first payment. I will make the remaining payments on this Note as follows: I will make the first payment on the due date of the first payment. All subsequent payments will be made on the due date of each payment as follows: I will make the remaining payments on the due date of each payment.

   (B) Amount of Monthly Payment
      The Monthly Payment will be the amount of $200. This amount does not include any property taxes, insurance, or other charges that may be required to pay such costs.

4. BORROWER'S RIGHT TO PREPAY
   I have the right to make prepayments of principal at any time before they are due. A prepayment of principal only is known as a "Prepayment." When I make a Prepayment, I will notify the Note Holder in writing and make the payment within 10 days of the due date. To make a Prepayment, I must make a written request to reduce the Principal amount of this Note. If I make a partial Prepayment, there will be no change in the due date or the amount of any Monthly Payment unless the Note Holder agrees in writing to these changes.

5. GOVERNMENT
   If applicable, loan rates and terms have been changed, and the loan is finally approved on the note, the interest or other terms charged will be no less in accordance with the law regarding the approved terms. The terms of the note will be subject to change and the interest of the note may be adjusted. Any changes in the terms of the note will be communicated to the Note Holder in writing within 10 days, and if any terms are adjusted, the note will be re-issued accordingly.

   The Note Holder may adjust the note by reducing the Principal amount on the note or by making a direct payment to the Note Holder. If a new interest rate is applied, the rate will be the interest rate stated in the new note.
Universal Communication - Enabled by cellular technology

A phone is registered on a cellular network. Calls and messages are then automatically routed directly to it, no matter the phone’s location, brand, operating system, or the carrier.
Universal Automation - Enabled by Integra technology

A document is registered on Integra Ledger*. Related data, documents, and automation triggers are then routed directly to it, no matter the document’s location, operating system, or software.

* Like a cell phone, only the numeric identity of the document is registered. No personal or private information is shared.
Smart Document is PDF, that can be verified as authentic using blockchain technology. When you can trust the document, the rich structured metadata contained within it can be used for automation into any software by simply mapping fields.

CEO
Every industry
Every relationship
Every situation
Every contract

Directly connect the data
via the Integra ID of the documents
Extremely Private and Secure

- Run on your own private infrastructure
- User and organization identity are managed locally and privately.
- Integra does not issue user IDs or store user information.

- Neither documents nor personally identifiable information are stored on Integra.
- Document identities are self-generated. Only those in possession of a registered document know the association.
Simple APIs add Integra functionality to any software
Integra Portfolio and Switchboard deliver for communication and automation
Working with Integra

• Join the Integra Development Cohort 2023 for full access to all Integra Ecosystem Technology. Invite clients to collaborate.

• Collaborate with Integra on a specific applications/integrations.

• Develop your own applications/integrations using Integra Ecosystem Technology, with Integra support as needed.
